

# Architecting an Optimal FinOps Platform

# Ajay Chankramath

# Head, Platform Engineering Thoughtworks North America

# DevOps Enterprise Summit

## Amsterdam 2023

# Conversation

-  What was the trigger for this activity?
-  Problem Definition - What & Why?
-  Approach to solving this problem
-  Platform Capabilities & Building blocks
-  Larger Context of Engineering Effectiveness
-  Takeaways & where do we go from here?

# Starting Point → 2023 Perspectives

Tactical activities are prioritized over higher-impact strategic initiatives  
**(KPMG)**

**85%**

Organizations embracing Cloud Native Development (Gartner)

Mature FinOps practices shift left  
....which enables engineering to .....  
accountable for the cloud spending  
**(FinOps Foundation)**

**Organizations need holistic platforms, not just a slew of tools and processes**

**Isolated Localized Optimizations continue to provide suboptimal results**

**30%**

... cloud spend is categorized as “waste”  
spend that can be optimized (IDC)

**60%**

..of enterprises will underestimate their  
Cloud Infra and platform services  
consumption rates (Gartner)

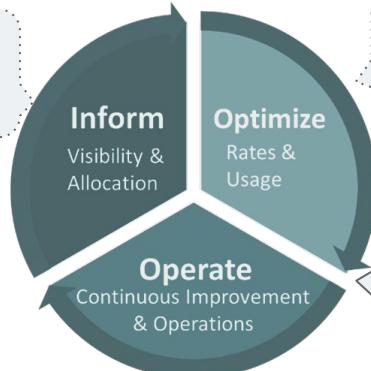

Buying FinOps tools and allocating  
people to FinOps activities can cost you  
more than it saves (McKinsey).

# Solving the FinOps Problem

## What's New About a FinOps Platform?

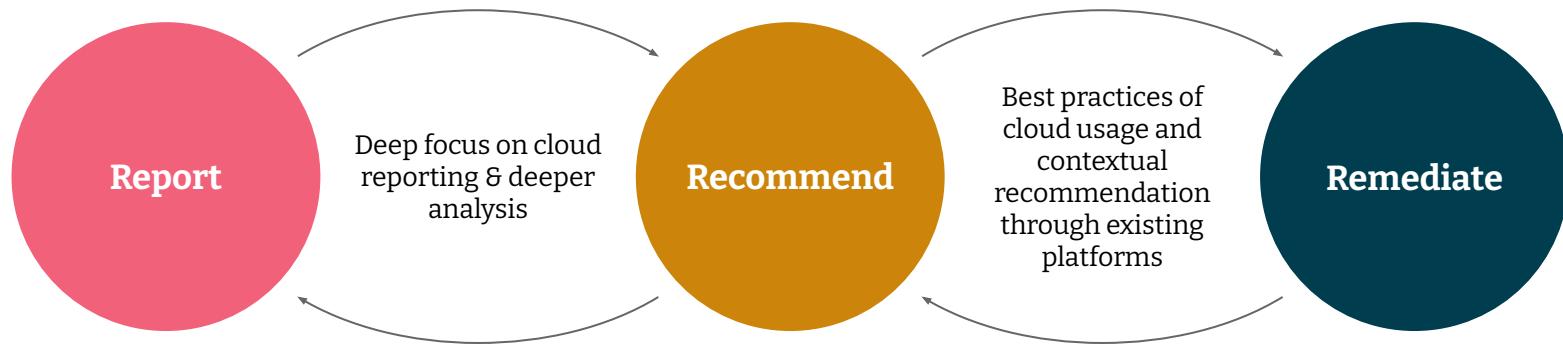

A plethora COTS **Reporting & Recommendation** Platforms!

Platforms providing limited AI based rate optimizations

Minimal inroads in COTS Platforms that provide **holistic optimizations** built into your ecosystem

# 3 R's of FinOps

Reporting & Recommendation Platforms/Tools

Build Platform Capabilities to automatically remediate

# Accelerator Platforms - What does it tell you?

## Reporting & Recommendation Platforms

### Overview (Kubecost Reporting)

Last 7 Days

Kubernetes costs  
\$145.11 ↓ 4.18%

Including 3 clusters [View report →](#)

### Savings (Kubecost Recommendations)

Estimated monthly savings available \$910.12

Category	Action	Save up to
Clusters	Delete unassigned resources	\$917.45 /mo
Clusters	Right-size your cluster nodes	\$220.32 /mo
Manage underutilized nodes	Cloud insight outside clusters	\$917.45 /mo
Manage underutilized nodes	Remedy abandoned workloads	\$220.32 /mo
Right-size your container requests	Cloud insight outside clusters	\$196.23 /mo
Right-size your container requests	Kubernetes Insight	\$100.30 /mo
Right-size your persistent volumes	Cloud insight outside clusters	\$44.48 /mo
Right-size your persistent volumes	Kubernetes Insight	\$30.04 /mo
